

COILJET® BACKPACK

CJ-BKPK

Key Category Competitor

Top User Requirements

- Easy to use; mix chemicals
- Long life battery
- Easy to carry / portable

The SpeedClean® CJ-BKPK CoilJet® Backpack - a Portable HVAC Coil Cleaning System. This product was developed and tested specifically for use with three SpeedClean chemical products: Speedy 3D Degreaser, Speedy Green Cleaner, and Speedy Fresh Deodorizer.

Small, portable design makes it easy to clean HVAC coils in hard to reach areas such as PTACs, rooftops, evaporators, refrigeration units and attics, where access to power and water is limited

Clean, degrease and deodorize all in one portable ecosystem without changing out chemicals or water sources

Separate on-board water and three separate chemical bottles eliminate the need for dragging hoses or bulky pump sprayers to clean coils.

0.6 gallon per minute flow rate won't overflow the indoor AC evaporator coil condensate line

LiPeFo4 12V Rechargeable battery makes it easy to clean virtually any coil, indoors or outdoors all day.

Frequently Asked Questions

Q. What is the warranty of the SpeedClean CoilJet® CJ-BKPK?

A. 1-Year Limited, Damages caused by misuse and use of unauthorized chemicals are not covered under warranty.

Q. How long will the battery last? ?

A. A full charge will last for approximately 17 tank loads.

Q. How is a CJ-BKPK better than a pressure washer?

A. SpeedClean CoilJet CJ-BKPK is a low flow low volume design so as to not damage condenser coils. Even a small 1,000 PSI pressure washer will damage the coils.

Q. How will the CoilJet CJ-BKPK save HVAC technicians money?

A. TIME! There are tremendous labor savings resulting from not having to hook up water supplies, drag hoses, run extension cords, remove condenser exhaust grates and evaporator housings.
